

**Title: Analysis of the Ethics behind data collection in the Smart Home Industry**

Ryan Blocker

Eid: 833058080

Description: I want to give a general overview of what the Smart Home industry is. Then I want to dive into the fact that our internet service providers can monitor our internet traffic through all our devices connected to our router. Then I want to go into the ethics behind the collection of this device data and what are some of the known uses ISP providers have used the data for.
